

## Pro-Link HD

### 5.8 GHz License-Free HD/SD Video Microwave link

#### Applications:

- Sports and entertainment
- Church worship production
- Broadcast news and production

#### Features:

- 5.8 GHz license-free operation
- MPEG4 compression
- Simple to use, Plug-and-Play operation
- High-quality, high definition/  
standard definition wireless  
camera link
- Lightweight transmitter
  - adds negligible weight to  
standard ENG camera
- 50 mW, COFDM modulation
- 2-way diversity reception
- Up to 2000' range (Direct line  
of sight)
- (CVBS), SDI, (HD) SDI input/  
outputs
- Balanced mic/line audio input/output with  
phantom power  
option
- AES encrypted for secure  
transmission

The RF Central Pro-Link HD system link is ideally suited for the rigorous demands of Sports/Entertainment production as well as ENG/EFP applications.

The Pro-Link HD system includes the transmitter and the receiver. The units also come standard with AES encryption, making them an ideal choice for surveillance and security specific wireless monitoring applications.

The RF Central Pro-Link HD is a state-of-the-art, 5.8 GHz license-free digital broadcast microwave audio/video link. The transmitter is designed to mount between an ENG camera and its battery but is unlimited in applications. The receiver can be mounted on the included tripod or in any suitable location. Depending upon conditions, the Pro-Link HD can link distance can range up to 2000 feet (610 meters).

Featuring MPEG4 video compression, the Pro-Link HD delivers high definition or standard definition video via its outputs.
