

LOW NOISE AMPLIFIER

Features

- Low noise
- High intercept
- Active Bias
- Internal voltage regulator
- Unconditionally stable

Options

- Other bandwidths
- Gain levels
- Lower noise figure
- Higher Ip3
- Other mechanical configurations

PS3144

Description

Designed for front end use in the UHF band, these amplifiers utilize GaAs FET devices to achieve low noise and high third order intercept performance, making them ideal for Paging and SMR Trunking applications. The unit contains an internal voltage regulator and active bias.

Model	PS3144	Units
Frequency	400-515	MHz
Gain (min)	16	dB
Flatness p-p (max)	+/-0.5	dB
NF (max)	1.3	dB
Input Return Loss (min)	11	dB
Output Return Loss (min)	11	dB
P1dB (min)	+20	dBm
Input Ip3 (min)	+17	dBm
DC Current (max)	150	mA

Specifications at T = +25°C and VDC=+10 to +15V

Storage temperature: -40 to +85°C

Humidity: 95% relative

Input/Output impedance: 50 Ω

Input/Output connectors: SMA

LOW NOISE AMPLIFIER

Company Design Philosophy

Essential to the company's strategy is the use of the latest and most sophisticated design software available. These design tools include complete suites of Agilent-EEsof, and AWR- Microwave Office, circuit and system high frequency EDA tools. The company consistently achieves its goal of accurately creating "prototypes" in software, as evidenced by its ability to go directly from a simulated design to deliverable prototypes and rapidly ramp to fulfill volume requirements. A crucial element of the company's development philosophy is to "design for production" to drastically improve manufacturability by virtually eliminating tuning and adjustments as part of the manufacturing process. The result is lower cost, higher reliability products with predictable delivery times.

The products shown on these data sheets are merely a representation of the company's capabilities, where a library of designs is available to draw upon to meet specific customer performance requirements. If you have a unique requirement, contact the factory to explore the latest in technology.
