

## eP5011R-LL.L RG-402 eP-Formable

## SMA Male Straight-SMA Male Right Angle

Choose any length from 3" and up

### Overview

- Impedance 50 ohms
- Frequency Range DC to 10 GHz
- Cable RG-402; Tin filled outer braid
- Nominal Cable O.D. 0.141" nominal
- SMA Male Straight Stainless Steel coupling nut  
Ni/Au-plated brass body
- SMA Male Right Angle Stainless Steel coupling nut  
Ni/Au-plated brass body

### Summary

The eP-Formable series offers users the ability to hand form cable assemblies to final shape. evissaP offers its Standard Product eP-Formable cable assemblies in a wide variety of connector configurations, cable diameters and 2 outer jacket options (tin braid and FEP). Standard Product eP-Formable cable assemblies are built using lead free solder in combination with state-of-the art induction soldering techniques. Construction using lead based solder is offered and can be ordered by specifying eP5011S-LL.L.

### Features

- Hand bend to final shape
- Anti-torque nut on SMA Straight Connector
- 100% VSWR test to 10 GHz
- 100% Hi-pot and continuity tests
- Fast delivery on standard lengths
- RoHS compliant per evissaP RoHS statement
- Cost-effective, manufactured in China at US wholly owned ISO9001:2000 facility

### eP-Formable RG-402 Tin-braided Cable Assembly

Unit price, typical delivery and +25° C performance to 10 GHz for popular cable lengths. Almost any cable length available in about 2 weeks.

Part Number	Popular Length inches	S11/S22 to 10 GHz (:1) Maximum	S21/S12 to 10 GHz (dB) Typical	Typical Delivery	10 to 24 pcs	25 to 49 pcs	50 to 99 pcs

> 83.9	Please contact evissaP

**evissaP Standards**

- When ordering, please specify cable assembly length in inches. Example: eP5011R-12.5 specifies a 12.5" long cable assembly.
- Label will have evissaP P/N and Date Code.
- Shipment will include evissaP's standard C of C.
- evissaP warranty applies.
- FOB is evissaP's San Jose, CA facility.
